NOTICE OF MEETING

<i>Meeting:</i>	CENTRAL BEDFORDSHIRE SHADOW SCRUTINY COMMITTEE
<i>Date:</i>	THURSDAY, 22 JANUARY 2009
<i>Time:</i>	6.30 p.m.
<i>Venue:</i>	ROOM 15, PRIORY HOUSE, MONKS WALK, CHICKSANDS, SHEFFORD

Jaki Salisbury
Interim Chief Executive

To: The Chairman and Members of the CENTRAL BEDFORDSHIRE SHADOW SCRUTINY COMMITTEE:

Cllrs Mrs P Staples (Chairman), A R Bastable(Vice-Chairman), P N Aldis, R A Baker, R G Baker BEM, L Birt, A Fahn, R Goodwin, D Hogan, J Kane, H J Lockey and G Summerfield

All other Members of the Council - on request

***MEMBERS OF THE PRESS AND PUBLIC ARE WELCOME TO ATTEND THIS
MEETING***

AGENDA

S1. **APOLOGIES**

To receive apologies for absence.

S2. **MINUTES**

To approve as a correct record the Minutes of the meetings of this Committee held on 4 September and 11 December 2008.

(previously circulated)

S3. **CHAIRMAN'S ANNOUNCEMENTS**

If any.

S4. **MEMBERS' INTERESTS**

To receive from Members declarations and the **nature** thereof in relation to: -

- (a) Personal Interests in any Agenda item
- (b) Personal and Prejudicial Interests in any Agenda item

S5. **DECLARATION IN RELATION TO THE EXISTENCE OF A WHIP**

To receive declarations from Members (if any) in relation to the existence of a whip. (Procedure Rule No. 16 refers)

S6. **REQUESTS FOR AGENDA ITEMS**

No requests for agenda items under the terms of Procedure Rule No. 8 have been received.

REPORTS

Item	Subject	Portfolio
S7	EAST OF ENGLAND PLAN REVIEW TO 2031 - EAST OF ENGLAND REGIONAL ASSEMBLY (EERA) CALL FOR ADVICE (To consider a range of matters in relation to the first stage of the review of the East of England Plan and the proposed response to the statutory call for advice from EERA. (Contact Officers: Mrs Sue Frost / Simon Andrews Tel: 01462 611352))	* Director of Sustainable Communities
S8	REVENUE BUDGET (To comment on the proposed revenue budget for 2009/10 and subsequent level of Council Tax. (Contact Officer: David Sutherland / Brian Mew Tel: 01462 611080 / 01462 611070))	* Director of Corporate Resources
	<i>Members to note that there is no written report for this item. A presentation will be made at the meeting.</i>	
S9	CAPITAL PROGRAMME 2009/10 - 2011/12 (To consider the Capital Programme presented at the Shadow Executive meeting held on 20 January 2009. (Contact Officer: Brian Mew Tel: 01462 611070))	* Director of Corporate Resources
	<i>Members are asked to bring with them their Shadow Executive Agenda 20 January 2009, including the supplementary document relating to the Capital Programme, which will be issued separately.</i>

SHADOW SCRUTINY

22 JANUARY 2009

SUBJECT	EAST OF ENGLAND PLAN REVIEW TO 2031 – East of England Regional Assembly (EERA) call for advice To consider a range of matters in relation to the first stage of the review of the East of England Plan and the proposed response to the statutory call for advice from EERA
REPORT OF	DIRECTOR OF SUSTAINABLE COMMUNITIES
<i>Contact Officers: Mrs Sue Frost/Simon Andrews</i>	

IMPLICATIONS

SUSTAINABILITY	The review of the East England Plan will be subject to a full Sustainability Appraisal/ Strategic Environmental Assessment.
FINANCIAL	None
LEGAL	The current East of England Plan is part of the statutory Development Plan and will be replaced by this review document once adopted.
PERSONNEL/EQUAL OPPORTUNITIES	None
COMMUNITY DEV/SAFETY	There has been no public consultation at this stage in the process
TRADES UNION	None
HUMAN RIGHTS	None

OTHER DOCUMENTS RELEVANT TO REPORT

List other docs - lower case, not bold
--

RECOMMENDATION(S):

<p>That Shadow Overview and Scrutiny Committee agrees the report as the basis of a response for Central Bedfordshire providing advice to EERA and recommends the report is agreed by Shadow Executive.</p>
--

Background

1. The Adopted East of England Plan was published in May 2008. It sets out a development strategy for the region up to 2021 and provides the framework for local authorities in the preparation of Local Development Frameworks (LDFs) and Local Transport Plans (LTPs).

2. In July the Regional Planning Panel considered a new Project Plan and Draft Statement of Public Participation for the Review of the East of England Plan. Both of these documents were the subject of public consultation until 15 September 2008.
3. The East of England Regional Assembly (EERA) issued a formal request for advice from the Strategic Authorities (also known as section 4(4) authorities) with a response period from the 17th November 2008 to the 6th February. At the time this was issued it was Bedfordshire County Council (BCC) and Luton Unitary Authority who were the responsible authorities and were leading the work.
4. On 28th November Bedfordshire County Council (BCC) ceased status as a section 4(4) SA, this being transferred to shadow Central Bedfordshire Executive and to Bedford Borough under the transitional regulations. Central Bedfordshire Council therefore needs to respond to EERA as an SA. However, Bedfordshire County Council officers have continued to be involved in the work to inform the advice to EERA working closely with officers from the Strategic Authorities.
5. The request requires the Strategic Authority to advise on a range of matters but this report concentrates on the main issue of 4 key housing growth forecasts and consequently what changes would be required to the existing East of England Plan.
6. In addition, comments are sought on the intention to integrate the Milton Keynes and South Midlands Sub-regional Strategy (MKSM SRS) fully into the East of England Plan.
7. As context to the request for advice EERA has identified the key issues likely to be facing the region as:
 - climate change and its impact on, among other things, flooding, infrastructure (existing and future investment), habitat change and food security;
 - Inter-regional relationships; and
 - Social, economic, demographic and technological change.

Timetable Concerns

8. There is widespread concern amongst the Strategic Authorities in the region at the very challenging timetable for the Review. This issue was debated at Regional Planning Panel at its September meeting, where the Strategic Authorities agreed to try to provide advice within the original timetable with EERA's understanding that further advice can be submitted as evidence allows - by making an "initial" submission by 7 January 2009, and then any further section 5(5) (sub regional policy changes) advice one month later on 6 February 2009.

9. Given the reorganisation issues in Bedfordshire agreement for a slightly later response has been confirmed by EERA. The Central Bedfordshire response will be determined at Shadow Executive on 17 February 2009. Bedford Borough will report to their Executive slightly later in March. The situation is also complicated by the fact that work to date for South Bedfordshire has been combined with Luton and has been considered by the South Beds and Luton Joint Committee. The Luton response, due to be considered by their Executive on 26th January, will address the Luton area and will also take into account the issues of growth around South Beds. A copy of the Luton report is attached as it usefully summarises the position for South Beds. However, as far as the formal Strategic Authority advice is concerned, the response of Central Beds must relate to the current Mid and South Beds areas.

Issues on which EERA requires advice.

Consultation and facilitation with all relevant authorities, sub-regions and stakeholders.

10. **Joint working**
Bedfordshire County Council as the strategic planning authority, initially led on the preparation of a response to EERA. An Officer technical group comprising all of the local authorities was set up and met at a series of workshops split between the north and south of the County. The workshops evaluated the potential of extending the current policy approach to accommodate additional growth implied under the governments 4 housing growth Scenarios. A representative from the Environment Agency was able to attend the County Workshop which allowed an initial but fairly sketchy input on issues of water infrastructure and other environmental concerns. More detail was available for the south than the north of the County.

11. Consultation

As well as consultation between the Bedfordshire authorities, EERA requested that the Strategic Authorities contacted key stakeholders within their area. Letters were sent by BCC and Luton to key stakeholders informing them of the review of the RSS and to explain that there will be opportunities for them to participate at future stages in the process. In addition, an article is being published in the January edition of 'We Love Bedfordshire' magazine to inform the general public.

Consultation has also been undertaken with the transportation team at Luton and the County Council to identify any initial major transport concerns that can be fed back to EERA.

Main Policy Issues

12. The adopted East of England Plan establishes a framework for development within the Region up to the year 2021 but the current review will extend that period to 2031 and will also consider issues beyond. The roll forward also needs to respond to recently published Government housing growth scenarios
13. As the Milton Keynes & South Midlands Sub Regional Strategy (MKSMSRS) already plans, provisionally for the period 2021-31, EERA intends to integrate the MKSMSRS growth areas within the East of England Plan review. However, the government's growth scenarios indicate pressure on these growth areas and indeed the residual rural areas in the East of England Plan up to and beyond 2021, to accommodate significantly higher housing provision for the period up to 2031.
14. To flush out alternative spatial options to inform the review, EERA issued a 'Call for Proposals' inviting developers to propose opportunities for new settlements and urban extensions of between 2,000 and 20,000 dwellings although these have no planning status and are speculative. Proposals submitted for the County are listed in Appendix 1 and dealt with from paragraph 33 below.
15. In addition, EERA has commissioned ARUP to produce a Regional Scale Settlement Study. The study assesses scope for settlement(s)/major urban extension(s) of 20,000 or more dwellings within the region. This is discussed from paragraph 35 below.

Housing Scenarios

16. EERA has requested that the following four scenarios be tested:-
1. RSS policy H1 pro rata to 2031: taking into account completions since 2006 and residual housing still to find to 2021. The residual housing still to find is included in a calculation to get a required annual completions rate to 2021 this is then extrapolated to 2031 to calculate an approximate requirement.
 2. National Housing Planning Advisory Unit (NHPAU) 'lower level' target: based on annual net additions required to meet government targets for the supply of new homes.
 3. NHPAU 'upper level' target: aims to ensure that the national quartile house price to earnings ratio is addressed (i.e. improved house price affordability through increasing supply).
 4. GVA or gross Value Added: where economic productivity is assumed to increase, boosting employment in certain GVA sectors in line with Regional Economic Strategy expectations, and resultant housing demand
17. The individual figures required as a result for each scenario for the county are set out in detail in appendix 2. Mid Bedfordshire is already planning an additional 4,800 dwellings through its draft Core Strategy to 2026. If the current policy of protecting the greenbelt and concentrating most development in the major and minor service centres were rolled forward it is estimated that a further approximately 3,250 houses could be built. This figure includes expansion of Milton Keynes into Mid Bedfordshire of around 2,000 as currently included in the Mid Beds Core Strategy. This figure equates to scenario 1 above and is the only scenario considered to be sustainable and deliverable without departing from the approach of the Core Strategy. The higher scenarios could involve unsustainable growth of existing settlements, a review of the greenbelt and further pressure on rural areas and the environment.
18. For the South Bedfordshire area, the emerging Luton and South Bedfordshire Core Strategy is planning for a housing provision of 43,200 dwellings to 2031 and thereby plans for scenarios 1 and 2. The consultations from work undertaken to examine the potential to exceed these concluded any further increase towards Scenario 3 would be untenable in sustainability terms and would put at risk the delivery of the emergent LDF strategy. The report going to the Luton Executive on 26th January also concludes this.

19. For the virtual County, EERA's forecasting model based on these scenarios, suggests a range of additional provision for testing of between approximately 78,400 and 108,300 dwellings for the period 2007 to 2031 compared to 70,900 if the current RSS policy H1 was rolled forward to cover the same period. This equates to an 11% to 53% increase on the rolled forward RSS. Completions and commitments equate to just under 51,000 dwellings which means that whilst progress is being made towards the current growth target, there is a significant challenge if anything other than the lowest scenarios are to be met.
20. The Strategic Authorities have been asked to advise on the potential consequences of achieving the growth associated with each scenario. In particular, EERA would like authorities to suggest which scenario most closely matches the authorities' aspirations for their local area.
21. The current RSS spatial strategy concentrates growth on key centres of Development and Change (KCDC). A key question for the review is whether this approach has the capacity to continue accepting development up to 2031 and beyond. In Bedfordshire's case the adopted Bedford Borough LDF Core Strategy plans to 2021. The other emerging core strategies are already planning to 2026 in the case of Mid Beds, and 2031 in the case of Luton and South Beds. In both cases work is ongoing to identify sufficient land to meet the challenge of the existing RSS.
22. One of the key objectives of the RSS review is to ensure the region's ability to deliver growth in a way which identifies the most sustainable strategy regionally. Therefore local testing of the scenarios must consider sustainability implications.
23. There is a need for the review to look beyond 2031 to ensure longer-term changes and implications are taken into account, of global issues for example.
24. The RSS Review Project Plan also stresses it is absolutely necessary for the review and scenario testing to address the quality not just quantity of development.
25. In addition the Project Plan raises the issue of the current target of 60% of development to be on previously developed land (pdl). The retention of this target is supported. Whilst it is recognised that the supply of pdl will diminish over time it is considered that the target will support the current emphasis on the regeneration and growth agenda for the KCDCs.

26. **Overall Scenario conclusions**
Through testing of the scenarios given by EERA it can be concluded that within Bedfordshire overall there is potential capacity for additional growth of up to 29,400 over and above commitments.
27. This means that a level of growth consistent with just above the Lower End Scenario (RSS Policy H1 taking account of residual) and below the NHPAU Lower Scenario could be met. **However this is dependent on the delivery of currently programmed infrastructure to deliver committed growth and remedy existing deficits, together with the provision of additional key infrastructure requirements and employment development which will be required to sustain further growth.**
28. Amongst the Local Authorities in Bedfordshire and across the region there is a consensus that scenarios 3 and 4 are completely unacceptable in sustainability, quality and deliverability terms. There is a particular concern about the ability to generate sufficient job growth on a countywide basis for even the lowest scenario. In addition, the current spatial strategy is seen, based on the joint technical work carried out for this review, as the most sustainable approach to meeting future development needs and represents the most appropriate response to the critical issues of climate change, the emphasis on the regeneration of the existing KCDCs, wider technological, economic and demographic change and the very real challenges presented by the growth requirements of the current RSS. Higher growth levels would also require the whole regional strategy to be reviewed because the levels of growth required can not be accommodated within the existing policy framework.
29. **Economic issues**
As stated above, performance of the national economy is crucial to the successful delivery of development and to achieve a better balance between housing and job growth. Few in the sub-region can envisage job growth being substantially in excess of recent performance with scenarios of 4 to 5,000 jobs a year being well beyond credibility.
30. **Potential Changes to the Existing Regional Spatial Strategy**
The East of England Plan is up-to-date and therefore policy changes are unlikely to be anything more than reflecting the emerging LDFs/core strategies until the regional spatial strategy growth requirements become clearer. Changes to policies at this stage are considered to be premature.

31. With the planned integration of MKSMSRS into the RSS there will be a need to consider any consequential policy changes elsewhere in the strategy. Outside of the key centres, any development is likely to be focused on market towns and larger villages as key service centres. This is likely to be primarily within Mid Bedfordshire, with its mix of major and minor service centres, and to a lesser extent in Bedford Borough. Such an approach is entirely consistent with the current RSS, Bedford Borough's adopted Core Strategy, the draft submission Core Strategy for Mid Bedfordshire and the emerging joint core strategy for Luton and South Bedfordshire. Only a strategy of dispersal of the majority of growth to such second and third tier settlements and/or the development of one or more major new settlement would bring into question consistency with the current RSS.

32. Greenbelt

On a specific point, the adopted East of England Plan raises two particular issues relating to Mid Bedfordshire only that need consideration as part of this review process. Both stem from proposals contained in the MKSMSRS. They are:

- The need for the implications for Mid Bedfordshire of the south eastern expansion of Milton Keynes, as proposed in the South East Plan, to be tested; and
- The consideration of compensatory extension of the green belt in Mid Bedfordshire, to the north of Luton.

It can be argued that the two issues are interrelated. Mid Bedfordshire District Council, in its submission draft core strategy, is proposing the extension of the green belt in the vicinity of Aspley Guise to avoid the coalescence of Milton Keynes with existing settlements.

Potential additional candidates for green belt protection at Cranfield, the southern Marston Vale and Arlesey / Stotfold.

Call for Development Sites

33. To allow early consideration of potential development sites and to inform the review, EERA issued a 'Call for Proposals' inviting developers to propose opportunities for new settlements and urban extensions of between 2,000 and 20,000 dwellings. It was stressed that submitting a proposal through this process did not indicate that it would be allocated, obtain planning permission or have the principle for the development established. Proposals submitted are listed in Appendix 1. This early identification allowed the suitability of such sites to be considered as part of the growth scenario testing.

34. In Central Bedfordshire, the responses received as a result of the Call for Proposals are being assessed as part of the work undertaken to test suitability in contributing to future development capacity to meet the alternative growth scenarios. None of the submitted responses are to date the subject of a planning application. Submissions within the Marston Vale are however among locations included as potential Eco-town locations. The submission at M1 junction 12 is in the location of a withdrawn planning application for residential, employment and a stadium.

Draft Regional Scale Settlement Study

35. In parallel with the call for advice from Strategic Authorities, EERA has commissioned ARUP to produce a Regional Scale Settlement Study. The study tests the provision of a large new settlement(s)/major urban extension(s) of 20,000 or more dwellings within the region. It looks at scenarios for settlement/extension size and location in order to assess whether this is a sustainable approach and, if so, where it could be located and what its impact will be. The assessment is based on an area's suitability against the following criteria:
- Growth potential;
 - Transport infrastructure; and
 - Physical and environmental constraints.
36. Strategic Authorities have been informed of the work's progress on a confidential basis but have had very little time to comment. BCC initially had a number of concerns which were circulated to districts and fed back orally to EERA via the EEDET Strategic Planning Group and at an RPAG workshop. The final draft ARUP study was submitted to EERA has been provided to Strategic Authorities on a confidential basis for checking of factual accuracy on a timescale considered to be unacceptable. The authorities' concerns have been forwarded to EERA and the Council is awaiting their response. At the time of writing this report the study and its findings remain confidential but members will be updated on this position orally at the meeting.

37. However, there are some general points which can be made at this stage as follows:
- It is important that the study examines the issue of a regional scale settlement in the context of what is the most sustainable spatial strategy for the region overall;
 - In a small county like Bedfordshire the establishment of such a settlement would undermine the planned growth areas in the north and south and the existing settlement hierarchy;
 - Additionally, there is the issue of how it would relate to the role of the possible Eco Town;
 - There are likely to be significant disadvantages in terms of the regeneration agenda for the main urban areas of Bedford/ Kempston and Luton/ Dunstable /Houghton Regis; and
 - Wider issues relating to the potential impact and the viability and vitality of existing settlements.

38. **Other Issues**

The consideration of Eco Towns outside of the RSS review process is of concern given the obvious links and implications between them.

39. Review primarily focused on the range of housing figures between the approved East of England Plan and the NHPAU lower, but with a longer-term view of capacity up to 2050. (Para 5.25 of Draft Project Plan). Consideration of capacity for development beyond 2031 is difficult and is likely to be inaccurate.

40. It is unclear how the revised Plan period of 2011-2031 relates to the period for scenario testing of 2007-2031. This needs to be clarified. For example how will any difference between required and actual dwelling provision for the period 2007-2011 be accounted for?

Next Stages

41. Following the submission of this advice and further technical work by EERA there will be a consultation on development options around Spring/Summer 2009. This will also allow any differences between EERA and Strategic Authorities to be highlighted. The consultation will include any proposed revisions to topic based generic policies.

42. **General Conclusions**

Central Bedfordshire has undertaken to make 'best endeavours' to assist in the review process and to provide advice where appropriate. Reflecting the widespread concerns of Strategic Authorities across the Region, the following general conclusions can be drawn:

- The timescale for a response to complex issues is very tight. In Central Bedfordshire's case the problems over this have been exacerbated by the additional pressures emanating from local government re-organisation. As a result it must be accepted that the advice is very much an initial reaction. As a result the Strategic Authorities reserve the right to refine initial responses in the light of further technical work and circumstances;
- One of the more challenging aspects of the advice has been the need to undertake sub-regional assessments to explore how four increased growth levels for the region to 2031 might be accommodated within the authorities' areas. The timeframe for the provision of sub-regional assessment work is particularly ambitious and has limited the ability for wider engagement. As a result there are widespread concerns emerging across the region about the likely quality and robustness of the work, therefore outputs from technical work will need to be treated cautiously;
- The relatively new, approved RSS housing requirements represent very challenging targets which, even without the current economic downturn, raise serious deliverability issues. In relation to this the authorities are aware of the findings of the House of Commons Environmental Audit Committee calling for the need for the Government to revisit its future housing targets;
- Technical work for the review in progress suggests that the upper growth levels are so high as to be undeliverable as well as being completely untenable and their implications profound;
- Creating and sustaining the necessary levels of job growth for the current regional strategy is extremely challenging. There must therefore be serious questions raised over the ability to provide sufficient job opportunities for any higher growth levels; and
- There is a very real danger of adding to the concerns of local communities already trying to get to grips with levels of growth identified in current plans and initiatives such as the eco-town proposals.
- The potential for a Regional Scale Settlement(s) in Bedfordshire will exacerbate further the concerns of local residents, and sustainability and deliverability issues raised for growth already committed or planned.

Appendix 1 – Development proposals submitted as part of EERA’s “Call for Sites”

Appendix 2 – Summary of growth scenarios

<i>Background Papers:</i>	East of England Plan (adopted May 2008) Mid Beds draft submission Core Strategy and Development Management South Beds and Luton Core Strategy documents
<i>Location of Papers:</i>	Forward Plans Team (Mid Beds documents) Joint Technical Unit (South Beds and Luton documents)
<i>File Reference:</i>	N/A

Appendix 1 – Call for Sites

Details of the following possible developments were received by EERA as a result of their Call for sites.

Barton Willmore

Junction 12 of M1 – up to 4,300 dwellings

Hives Planning

Land in Northern Marston Vale – at least 5,470 dwellings.

Hives Planning

Land East of Leighton Linlade and at Mile Tree North – up to 7,400 dwellings.

Samuel Rose

Land East of Milton Keynes – up to 8,000 dwellings.

O&H Properties

Northern and Southern Expansion of Wixams – up to 3,100 dwellings.

David Lock

Marston Vale Eco Town – up to 15,400 dwellings.

Stuart Smith Reynolds

Houghton Regis North – up to 12,000 dwellings.

Savills

South East of Milton Keynes – up to 6,600

JB Planning Associates

West Luton – 5,000+ dwellings (masterplan not yet drawn up).

To respond to a statutory call for advice from the Regional Assembly.

RECOMMENDATION(S)

Executive is recommended to approve the conclusions of the report. This finds that the merging core strategy is already addressing the lower two of the four EERA housing growth Scenarios to 2031 whereas the higher two options are untenable - as Borough Council's advice to the Regional Assembly for the East of England.

BACKGROUND

1. The Adopted East of England Plan (EoE Plan) was published in May 2008. It sets out a development strategy for the region up to 2021 and provides the framework for local authorities in the preparation of local development documents and local transport plans.
2. The East of England Regional Assembly (EERA) has formally requested Strategic Authorities (SAs) to advise on reviewing this plan to 2031 with a consultation running from the 17th November 2008 to the 6th February 2009. Specifically 4 housing growth scenarios are to be tested (see section 17 and 18 below).
3. The Borough Council (and other SAs) in a written response to the draft request pointed to the very challenging timetable for the review but agreed to endeavour to meet it on the understanding that any views can be suitably caveated and subsequently modified, particularly where further emergent studies and delayed evidence allows (e.g. EERA's Regional Scale Settlement study is yet to report).
4. In recognition, EERA require an "initial" technical submission by 7 January 2009, and then any further section 5(5) (sub regional policy changes) advice one month later on 6 February 2009. There are also further formal regional review consultation stages in 2009 where SAs can develop technical evidence and their policy advice.
5. On 28th November Bedfordshire County Council (BCC) ceased status as a section 4(4) SAs, this being transferred to shadow Central Bedfordshire Executive and to Bedford Borough under the transitional regulations. However, as reported to Joint Committee on 27th November, joint working remains inclusive of BCC officers as agents to the shadow Unitary Authorities (UAs) and former district officers in developing advice, in a coordinated way with the Borough Council as far as possible.
6. This report therefore, concentrates mainly on the 4 key housing growth forecasts, the resulting employment distribution and the sub regional policy implications affecting the Growth Area (GA) and south of the county. Bedford Borough Unitary portfolio holders and Central Bedfordshire 'shadow Executive' (17th February) will respond to EERA in February.
7. A separate technical report (Appendix 1) details advice on a schedule of specific matters EERA requested, although not all are addressed as some matters are for the county/shadow UAs to consider and comment upon, specifically relating to the north of the County.

REPORT

8. The EoE Plan established a framework for development within the Region up to the year 2021 but now needs to extend to 2031 and also consider issues beyond. The roll forward to 2031 also needs to respond to recently published Government housing growth scenarios and sustainability and climate change requirements.
9. The Milton Keynes Sub Regional Strategy (MKSRS) already plans development for the Luton and South Bedfordshire GA up to 2031. EERA therefore, intends to integrate the GA within the EoE Plan review. However, the 4 housing growth scenarios indicate additional pressure on the GA and indeed the residual area in South Bedfordshire up to and beyond 2021, to accommodate significantly higher housing provision for the period up to 2031.
10. To flush out alternative spatial options to inform the review, EERA issued a 'Call for Proposals' inviting developers to propose opportunities for new settlements and urban extensions of between 2,000 and 20,000 dwellings although these have no planning status and are speculative. Proposals submitted for Luton and South Bedfordshire are listed in Appendix 2 and dealt with under Conclusions (section 27 of this report).
11. In addition, EERA has commissioned ARUP to produce a Regional Scale Settlement Study. The study assesses scope for settlement(s)/major urban extension(s) of 20,000 or more dwellings within the region. However, this work is seriously delayed and yet to be reported and so does not inform this advice - although it is understood that there are no significant proposals likely to affect the GA directly.
12. EERA also asked SA to consult key Bedfordshire stakeholders. A letter explaining the current process has been sent out jointly by Bedfordshire County and Luton Borough Councils also advising that there will be an opportunity to take part in future stages.

Joint Working

13. An Officer technical group comprising all of the section 4(4) SAs and shadow UAs was set up and met at a series of workshops split between the north and south of the County. The workshops evaluated the potential of extending the current policy approach to accommodate additional growth implied under the governments 4 housing growth Scenarios.
14. Officers from the Joint Technical Unit (JTU) applied key sustainability criteria suggested by EERA summarised as sustainability, environmental, economic, social, transport and deliverability implications. The work on the emerging preferred options and the discounted options for the growth area was then reassessed on the basis of any additional scope for physically accommodating additional housing and the likely implications against these criteria.

Appendix 3

15. The workshop concluded that under current planning proposals to 2031 in the emerging Core Strategy, 2 of the 4 housing growth scenarios were already being addressed. The MKSRS already allocated additional 'untested planning assumptions' of 15,400 dwellings beyond 2021 to 2031 (+ 500 dwellings assumed for the residual area). This effectively means that from 2007, the GA is only testing scenarios 3 and 4 i.e. delivery of an extra +9,300 to +500 dwellings to 2031 (Table 1 below)..
16. A further overview workshop took place on 11th December. The Environment Agency attended to advise on ecology, flood risk and waste water treatment issues. The workshop also considered any evidence from the other workshops on any necessary policy departure, cross boundary issues and potential district redistribution of housing growth.

Scenario Housing Growth Implications

17. For the Luton and South Bedfordshire GA (including the residual area of south Beds for the purposes of preparing the joint Core Strategy), the following four scenarios were tested:-
 1. RSS policy H1 pro rata to 2031: taking into account 2006-2021 residual housing still to find to 2021.
 2. National Housing Planning Advisory Unit (NHPAU) 'lower level' target: based on annual net additions required to meet government targets for the supply of new homes.
 3. NHPAU 'upper level' target: aims to ensure that the national quartile house price to earnings ratio is addressed (i.e. improved house price affordability through increasing supply).
 4. GVA or gross Value Added: where economic productivity is assumed to increase, boosting employment in certain GVA sectors in line with Regional Economic Strategy expectations, and resultant housing demand.
18. These scenarios translate in houses to build target as set out in Table 1.

Table 1: SBDC & Luton "housing to build" requirements (rounded) 2007-2031:-

Planned Core Strategy dwelling provision to 2031	Joint Growth Area Housing Growth Scenarios	Scenario Dwellings to build 2007 to 2031	To find above Core Strategy housing provision	% increase
	1. RSS policy H1	+38,600*	-	-
	2. NHPAU Lower	+41,700	-	-

Appendix 3

43,200	3. NHPAU Upper	+52,500	+9,300	+22%
	4. GVA growth	+43,700	+500	+1%

* Scenario1: EERA require testing 2006 to 2031

19. From the above table it can be seen that the proposed Core Strategy housing provision of 43,200 dwellings to 2031 already plans for the scenarios 1 and 2 - and arguably also approaches Scenario 3 GVA target. In terms of delivery – allowing for 2001-07 completions, historic building rates need to increase from 919 dwellings per annum to 1,500 dwellings per annum.
20. There continues to be a ‘pent up’ market demand and housing need - particularly for social and affordable family housing - in Luton where land supply is constrained. The required step increase in house building is achievable when examined against such local housing market conditions and recent performance. However, this step increase will require putting in place delivery mechanisms (e.g. an LDV) in addition to land supply in sustainable urban extensions served by strategic infrastructure. This will significantly boost delivery rates in south Bedfordshire - currently constrained by green belt and poor strategic infrastructure.
21. This serviced land supply, together with a step change, is also needed to help reduce the amount of long distance commuting to work and to ensure that planned employment provision is balanced with new households -although the GA clearly has a sub regional role as stated in the MKSRS in meeting wider needs including arising from Greater London.

Scenario Employment Growth Implications

22. The current aspiration or ‘reference value for monitoring’ is to generate 23,000 net additional Jobs in the GA over the period 2001-2021 as set out in the RSS. Taking into account the MKSMSRS additional 7,400 jobs between 2021 and 2031, this comes to a total requirement of 30,400 jobs.
23. Table 2 below, compares actual change in employee numbers in recent years (ABI source data) and the predicted trend, compared to the forecast jobs arising under each housing growth scenario.

Table 1: SBDC & Luton Employment requirements (rounded) to 2031:-

Joint Growth Area Employment Growth Scenarios	Forecast jobs 2007 to 2031	Employment trend 2001 to 2007	Predicted employment performance based on trend to 2031*
1. RSS policy H1	+40,100	+5,600	27,900
2. NHPAU Lower	+43,300		
3. NHPAU Upper	+51,500		
4. GVA growth	+76,700		

*Allows for an estimated+13% self employment

Appendix 3

24. In terms of recent trends, the economic performance of the joint area is dominated by Luton (e.g. Capability Green) with significant planned investments to be completed (e.g. Century Park, Butterfield Green and Napier Park). Such recent trends would support the feasibility of meeting the planned RSS and MKSM-SRS job requirement of 30,400. However, the scenario forecasts suggest more intervention will be needed. Nevertheless, a step increase in job creation will be achievable (assuming any future economic recovery) through trend allied to provision of key/strategic employment sites in the growth area urban extensions. This is a key recommendation of the joint Luton and south Bedfordshire Employment Land Review (ELR Feb 2007). This ELR strategy will also serve the Luton element of the conurbation in any economic upturn, with restructuring towards high technology and value added sectors.
25. Aspiring to meet the scenario job forecasts of +40,100 to +43,300 under scenarios 1 and 2, is also supported to maximise sustainable development, in terms of balancing jobs per household – increasing the planned ratio from 0.7 jobs per household to a ratio of 1.0 (i.e. a closer degree of self containment in urban extensions). Scenarios 3 and 4 are not feasible.
26. In summary, the economic factors all suggest that the emerging Core Strategy faces a significant challenge to deliver economic milestones, with a good prospect of success based on past performance, provided that key land and infrastructure is delivered. Scenarios 1 and 2 are close to the planned strategy capacity (allowing for existing provision yet to be completed). However, to do any more in terms of loading on more housing growth risks failure, and potentially unsustainable growth and travel patterns, as the economy is unlikely to support development beyond what is already planned and existing provision yet to be completed.

CONCLUSIONS

27. The Key findings examining the current planned approach for the GA against the 4 housing growth scenarios are listed below:-
 - The broad Core Strategy preferred options are the most sustainable locations;
 - None of the discounted options were feasible or sustainable to accommodate development;
 - At best it may physically be possible to accommodate up to 3,000 additional dwellings – however, these would be unsustainable against the given criteria (e.g. deliverability, economic capacity);
 - To pursue additional growth whether via higher density or additional land take would seriously put at risk delivery of the existing Core Strategy, the vision, spatial priorities and integrated landuse and transport strategy at the heart of the growth area;

Appendix 3

- Residual area rural settlements would not make a strategic contribution, needing to remain in scale and keeping with their form and setting in the south Bedfordshire green belt (respecting the Core Strategy Issues and Options consultation)
 - The four developer bids (listed in Appendix 2) offered no significant new economies of scale or solutions to overcome any default against the given assessment criteria and did not relate to the vision and integrated concept of delivering a growth area.
 - Existing growth proposals are still being tested and stretched against the key infrastructure delivery dependencies, testing of additional development loading is therefore, premature and runs the real risk of blocking LDF progress achieved so far.
28. Overall the series of workshops concluded that, taking the scenarios into account; scenarios 3 and 4 were untenable. Particularly, for the south of the county - there was no justification for altering or amending the sub regional policy framework as scenarios 1 and 2 were already being addressed. The pressure to accommodate additional growth will seriously undermine, and put at risk, the delivery of the hard won emergent LDF strategies, for a step increase in existing policy commitments to 2021 and beyond to 2031 against a sustainable development strategy and the planned capacity of the economy.
29. However, examining broader strategy, sustainable development issues and climate change, it was considered that EERA needs to ensure that key evidence e.g. on the Regional Scale Settlement Study (e.g. new settlements of 20,000+), is duly made available, in order to test sustainable development options across the region, against the spatial strategy. Until this work is available and complete, there will be significant uncertainty and additional strategic risks. Specifically, any emergent large scale development proposals of 20,000+ dwellings, will have cross boundary implications. Such proposals could expose embryonic growth areas, such as the Luton and South Beds GA, to considerable risks in terms of delivery, priority of investment and integrated land use transport strategy and indeed the capacity of the building industry and economy to respond. Any such departure would also have to be justified against a regional assessment, looking at the role and function of major new and existing settlements and growth drivers, including cross regional transportation networks outside the Bedfordshire and Luton component of the MKSRS sub region.
30. The Executive committee is asked to endorse the work and issues identified in this report as the basis for a technical and policy response to EERA.

Appendix 3

PROPOSAL/OPTION

The Borough Council may choose not to submit advice to EERA on the consultation and review of RSS. However, this would run the risk of development being imposed on the borough and surrounding communities with no democratic input to ensure that development is sustainable, deliverable and supported economically and by planned infrastructure.

ENVIRONMENT IMPLICATIONS

The decisions on regional spatial policy and sub regional policy will set the context for delivering sustainable communities and a quality environment for the citizens of Luton and surrounding communities affected by the growth area.

SHADOW SCRUTINY COMMITTEE

22 JANUARY 2009

SUBJECT	CAPITAL PROGRAMME 2009/10 – 2012/13 (To consider and comment upon the draft Capital Programme for Central Bedfordshire and accompanying report to be considered at the Shadow Executive meeting on 20 January 2009.)
REPORT OF	Director of Corporate Resources
<i>Contact Officer: Brian Mew (Tel: 01462 611070)</i>	

IMPLICATIONS

SUSTAINABILITY	The Council's Capital Programme is directed towards achieving the Council's key priorities, including managing growth effectively.
FINANCIAL	The Capital Programme includes potential capital investment of up to £160 million over the next four years. The revenue effects of that part of the Council's Capital Programme that is not funded by external finance forms a significant element of the Council's revenue budget.
LEGAL	The provisions in the Capital Investment Strategy and the detailed documents produced in respect of it will ensure that the Council fully complies with all legislation and regulations in relation to Capital Finance.
PERSONNEL/EQUAL OPPORTUNITIES	None
COMMUNITY DEV/SAFETY	None
TRADES UNION	None
HUMAN RIGHTS	None
KEY ISSUE	Yes
BUDGET/POLICY FRAMEWORK	The Capital Programme ultimately approved by Central Bedfordshire will form part of the Council's Budget and Policy Framework.

OTHER DOCUMENTS RELEVANT TO REPORT

Capital Investment Strategy Report to Shadow Executive 16 December 2008

RECOMMENDATION (S):

That the Shadow Scrutiny Committee consider and comment on the proposals set out in the Shadow Executive report to be considered on 20 January 2008.

Reason for Recommendation: To progress the process of approving the Capital Programme.

Background

1. At its meeting on 16 December 2008, the Shadow Executive approved a draft Capital Investment Strategy and process for considering the Capital Programme for the period 2009/10 – 2012/13. The Council's Capital Programme, which is directly influenced and informed by the Capital Investment Strategy, is a major component of the Council's Medium Term Financial Strategy with significant financial implications.
2. The Shadow Executive will be considering a report on the draft Capital Programme for Central Bedfordshire at its meeting on 20 January 2009. This report will be forwarded to members of this Committee following completion of current work being undertaken on prioritising and reviewing the draft Capital Programme.
3. As part of the process of approving the Capital Programme for Central Bedfordshire, the Shadow Executive invites the Shadow Scrutiny Committee's comments on the draft Capital Programme under consideration. The Committee's comments will be reported to the next meeting of the Shadow Executive on 17 February 2009, when the Shadow Executive will recommend a final Capital Programme for approval to the Central Bedfordshire Shadow Council on 26 February 2009.
