Population	128700		Prevalence		2416								

*Notes:

Email Health@Focused-On.com for a copy of our paper "FocusedOnDementiaMortality2" - An Appraisal of Mortality Assumptions

Base Cohorts are the Population without Dementia

People with Dementia may be Recognised (in Dementia Services) or Unrecognised ("Declined" in model due to Budget Limitations)

LOS is average expected Length of Stay (Months) in Level1-4

Like Dementia related Mortality Statistics, there are only a few cited Studies of Incidence Rates. These illustrative statistics are Rates per 1000-Person Years & Adjusted for Mortality

Importantly, the Dementia-Executive provides a benchmark against which Users can judge & select from financially competing High Impact Initiatives proposed by Staff, Service Providers, Advocates, Carers, Voluntary Organisations, & People with Dementia.
