

## Petition to reduce the legal speed limit for the village of Higham Gobion

Petition summary and background	At present the speed limit through the village of Higham Gobion is <b>60mph</b> . We have residential homes with young children, a business park employing in excess of 100 people, a church and many bridle paths. [The lastest in a long list of motor accidents in our village saw a car colliding with a telegraph pole, knocking it over the wall of a home housing two small children and subsequently losing power and telephones to part of the village for ten days.]
Action petitioned for	We, the undersigned, are concerned members of the public, who live in Higham Gobion or are regular users of the stretch of road in question, who are concerned about the safety issues of cars driving through the village at motorway speeds and who urge our elected local representatives to act immediately to reduce the speed limit.
